SUMMARY

Adaptable Software Engineer who seamlessly navigates across user-facing applications, systems programming, and cloud infrastructure. A quick learner who balances the industry's rapid shift toward AI-driven workflows and agentic orchestration with a deep commitment to core computer science fundamentals. Always eager to tackle complex engineering challenges, explore new technologies, and deliver highly optimized solutions.

EXPERIENCE

Software Engineer Intern, Hooman Digital

Oct 2025 – Nov 2025

- Shipped **3 AI-driven products** using **MCP** and **AI SDK**, integrating intelligent chat and automation workflows
- Contributed to the **Nosana-deployer MCP** project and its chat integration
- Integrated **Stripe** payments into chartor.ai, including checkout flows and webhook handling
- Containerized and deployed **5+ services** on **AWS ECS** with **Secrets Manager** for secure config
- Set up **CI/CD pipelines** using **GitHub Actions**, reducing deployment time by **80%** (30min to 5min)
- Worked across **Next.js**, **Express.js**, and **Electron.js** codebases

PROJECTS

Redyx – Go, gRPC, Kafka, Redis, PostgreSQL, Astro, Svelte, Kubernetes, Docker

- Built an anonymous community-driven discussion platform as **12 Go microservices** communicating over **gRPC**, fronted by an **Envoy** API gateway
- Implemented event-driven architecture using **Apache Kafka** for vote processing, search indexing, notifications, and spam analysis
- Designed application-level database **sharding with consistent hashing** for the Post Service across multiple **PostgreSQL** instances
- Built the frontend with **Astro (SSR)** and **Svelte** islands, and deployed on **Kubernetes** with **Prometheus**, **Grafana**, and **OpenTelemetry** observability

Foccus – Tauri, Rust, TypeScript, React, Tailwind CSS

- Built a highly optimized, cross-platform desktop Pomodoro timer with a retro flip-clock UI, achieving a lightweight **5.6 MB binary** size using **Tauri (Rust + React)**
- Implemented system tray integration, global keyboard shortcuts, and mini-mode overlay using **Rust**
- Developed customizable work/break session features with desktop notifications and sound alerts
- Created robust cross-platform installation scripts (**Bash**) with automated packaging for Linux and macOS

ExpTrack – Expo, React Native, Rust, Axum, SQLx, PostgreSQL

- Developed a full-stack expense tracker with a **React Native (Expo)** app and **Rust (Axum)** backend
- Integrated **PostgreSQL** with **SQLx** for type-safe queries and schema-driven data access
- Added secure local storage for auth tokens and optimized data fetching with **TanStack Query**
- Authored validated forms using **React Hook Form** with **Zod** and reusable native UI components

TECHNICAL SKILLS

Languages: Rust, TypeScript, Python, Golang, C/C++, SQL, Bash

Frontend: React, Next.js, Astro, React Native (Expo), Tailwind CSS, Zustand, TanStack Query

Backend: Node.js, Express, Hono.js, Axum, Go Fiber, GraphQL, Socket.io, Prisma

Web3: Solana, Ethereum, Anchor, Solidity, Web3.js, Ethers.js, Wagmi, Wallet Adapters

Databases: PostgreSQL, MongoDB, Redis, MySQL

DevOps: AWS (S3, EC2, ECS, ECR, Secrets Manager), Docker, Kubernetes, Terraform, GitHub Actions, Kafka, Prometheus, Grafana, Loki, Jaeger, Envoy

AI Agents & Tools: Claude Code, Cursor, OpenCode, Codex (Expertise in MCP, Custom Agents like GSD & BMAD, Multi-Agent Orchestration, Tool Calling, Hooks, Commands)

Core Subjects: Operating Systems, Computer Networks, DBMS, Object-Oriented Programming

Tools: Git, Linux, Turborepo, Vitest, Postman

EDUCATION

Central University of Rajasthan

Bachelor of Technology in Computer Science and Engineering

- **CGPA:** 8.69/10 (5th Semester)

Ajmer, Rajasthan

Aug 2023 – May 2027
